

J.F. Garcia, D.D.S., M.S

ENDODONTICS

Through the years, Quality Centered Endodontics has established itself in Dallas as an endodontic practice dedicated to highly exceptional care using state-of-the-art technology.

The practice's mission is clear: to provide patients with the finest endodontic (root canal and root surgery treatment) available anywhere, in a comfortable and courteous atmosphere.

Dr. Garcia completed his graduate dental training at Louisiana State University School of Dentistry. Aware of his passion for the field of endodontics, he pursued specialty training in endodontics, along with a master's degree at the University of Michigan School of Dentistry in Ann Arbor, Michigan.

During his graduate training, he taught clinical endodontics at the University of Michigan and upon graduation, he underwent a rigorous examination process and became a board-certified endodontist and Diplomate of the American Board of Endodontics.

He continues to gain knowledge and expertise through courses every year to make sure he is on the cutting edge in his field. Dr. Garcia is also a strong advocate of minimally invasive dentistry and has been incorporating this modern approach into the field of endodontics for many years.

Aside from the use of ZEISS microscope magnification for every case performed, his office is also equipped with 3D imaging (computed tomography), allowing him to provide a more targeted, precise, and effective clinical treatment.

Dr. Garcia is honored to be selected for *D Magazine's* Best Dentists in Dallas, and he takes the opportunity to thank his peers for selecting him to this prestigious group.

EDUCATION

D.D.S., Louisiana State University; AEGD, University of Connecticut; Endodontic Residency and M.S., University of Michigan
